P Series

OTHER CONTROL GRIPS

Scorpion also offers several other styles of control grips. Like all our products, these can easily be customized to exactly what you need. The fighter jet "B" Series grip is shown on the left. It is available in left and right hand models. A single trigger, 4 way hat switch, and 4 other pushbuttons (or toggles or LEDs) can be installed. On the right is our simple post style "P" Series grip. Rockers, toggles or pushbuttons can be supplied. For more details see www.controlgrips.com/Otherseries.php.

Specifications, Features, Benefits

M Series

K Series

OTHER CONTROL GRIPS

Rounding out our lines of control grips are the “M” Series on the left and the “K” series on the right. The “M” series is our original model handle, and is still available. It’s available with 0, 1 or 2 trigger functions and up to 4 faceplate buttons. As with all our products, it can be customized as needed. The “K” Series is a basic knob to fit on our (or your) joysticks. Blank knobs, or knobs with pushbuttons, toggles or rockers can be supplied. Our website, www.controlgrips.com/Otherseries.php, shows several example configurations of all of these grips.

Specifications, Features, Benefits
